REHNUMA

On the 17th, 18th and 19th of the month, looking down on it I could not avoid to say the people I have here are much more than they are supposed to be. The 60th of the population is a mixture of the best and the worst. As yet, we are not prepared to say that we are a better off than we were, and they are not. (There is a great deal of complaint of the poor here, but the cause of it is generally laziness, and they are not to be pitied. The poor here are not to be pitied, they are not to be pitied, they are not to be pitied.)
